

AMENDMENT

U.S. Appln. No. 09/151,300

4 20. (Amended) A system as claimed in claims 1/7 or 1/8, further comprising a voice prompting system for directing a user through a protocol employing said defibrillation system and said oxygen delivery system.

REMARKS

The present Amendment is in response to the Office Action dated March 21, 2001. In view of the foregoing amendments and the following comments, favorable disposition of the subject application is kindly requested.

By way of this Amendment, all claims excepting claims 2, 5, 15 and 17-26 have been cancelled. Inasmuch as this set of claims was allowed by the Examiner in the aforementioned Office Action, it is believed that the application now stands in *prima facie* condition for allowance. The only amendments which Applicants are making at this time are simply to add a multiple dependency as to claims 19 and 20, and to correct a minor error in claim 15.

Applicants intend to further prosecute the currently cancelled claims via a continuing application which will be filed shortly.

In renumbering the claims for allowance, Applicants kindly request that claim 17 be renumbered as claim 1.

In view of the foregoing, it is believed that the present application is in full condition for allowance, and, accordingly, favorable further action is respectfully solicited.

Respectfully submitted,

Richard C. Turner
